

Day four

June, Thursday 25th

Recap time!

- Sinatra routes, views & sessions
- Active Record
- Intro to unit testing with RSpec
- The marvelous world of TDD

Yesterday's exercises

General questions

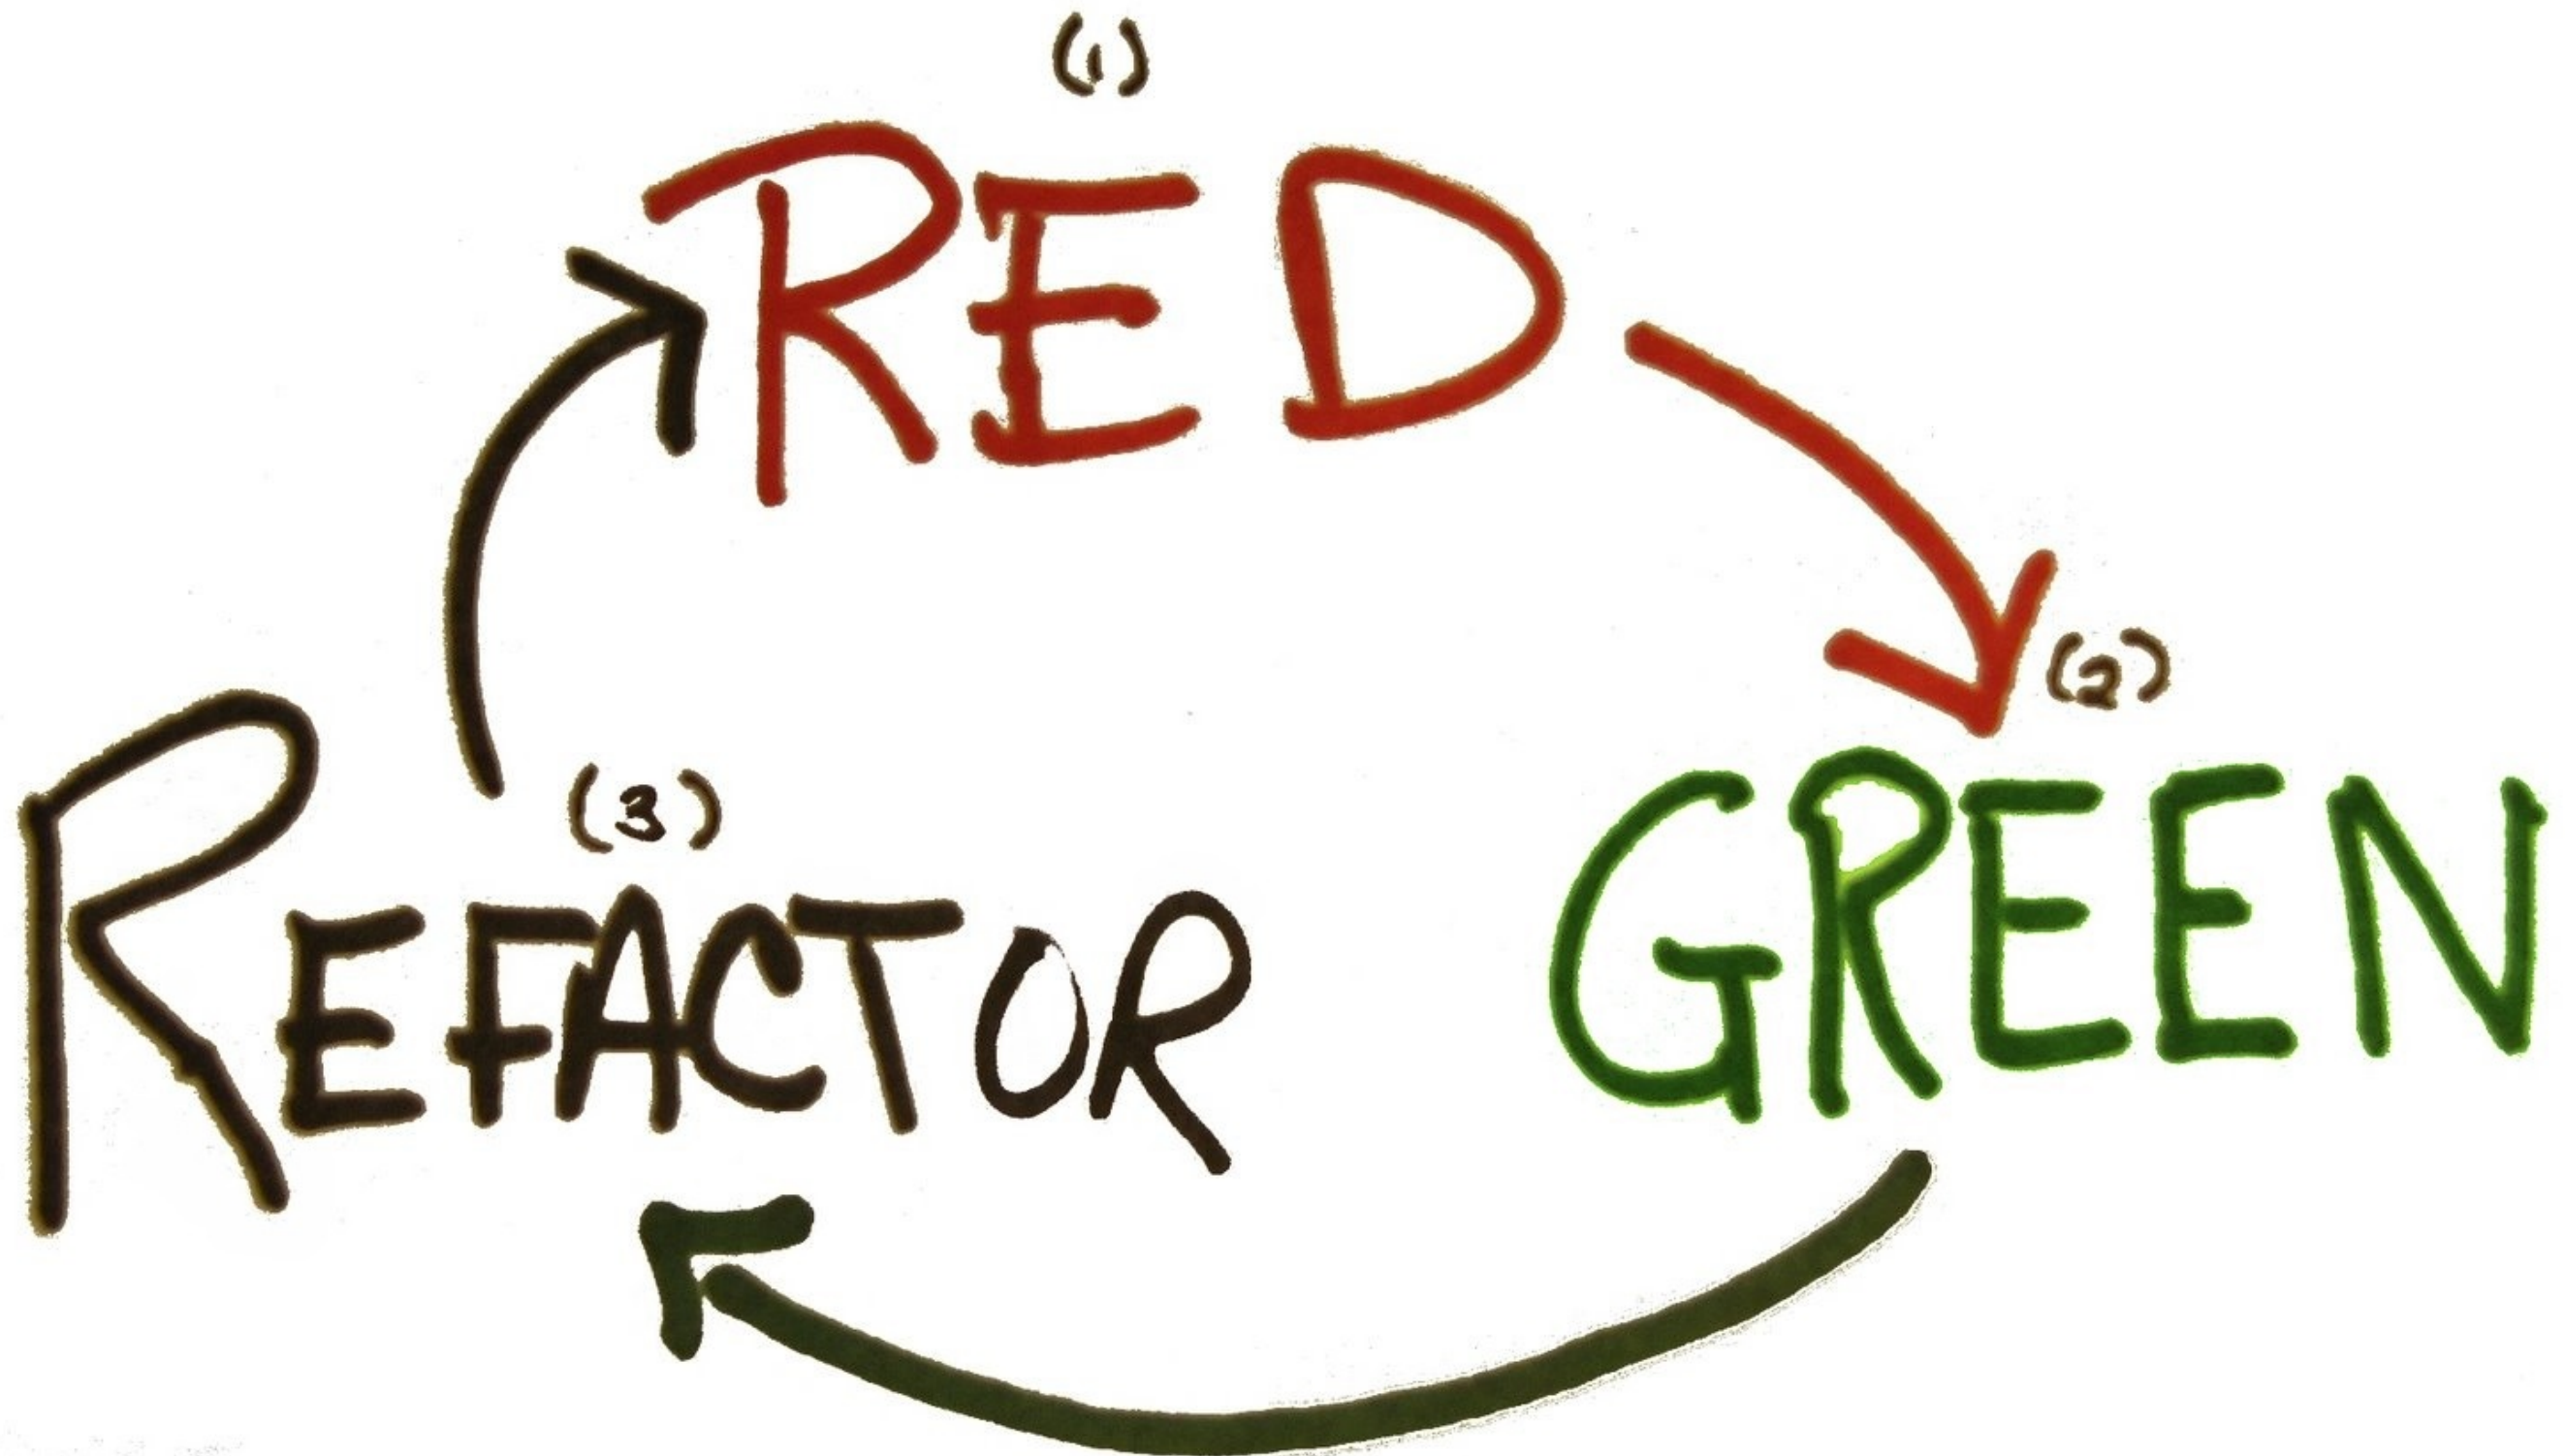

So, now

Day four, Thursday, 25th

- Refactoring & test doubles
- Open class

Refactoring

The refactoring circle of life

Refactoring

- Changing the implementation but not the specification
- Being our code the implementation, and our specs the specification...
- ...we just change the implementation and use the specs to check it

Continuous integration

- Automate spec automation!
- Allows us to externalize the policeman role
- It's a sempahore!

Test doubles

Test doubles

- Minimize objects complexity when testing
- Same behavior, but just a facade
- We'll mainly treat **stubs**

LIVE CODING FROM BCN!!!!!!!

Refactor *mather* &
test doubles

LET'S GET READY TO RUMBLE

Exercises SLI2 & SLI3

Open class

Exercises OC3 & OC4
